

MOHD. MUSHEER

AI/ML Engineer | Generative AI | RAG Systems | LLM Applications

+91 9370086707 | musheerayan@gmail.com | musheer.me | [LinkedIn](#) | [GitHub](#) | Pune, Maharashtra

PROFESSIONAL SUMMARY

AI/ML Engineer experienced in developing LLM-powered applications, Retrieval-Augmented Generation (RAG) systems, and NLP solutions using Python, PyTorch, FastAPI, and Docker. Built AI assistants, documentation copilots, and machine learning applications involving semantic search, prompt engineering, REST APIs, and scalable deployment. Passionate about Generative AI, LLM systems, and applied machine learning, with a strong interest in building practical AI solutions.

EDUCATION

Bachelor of Computer Applications (BCA)

Takshashila Mahavidyalaya, Amravati

2023 – 2026

CGPA: 8.09

TECHNICAL SKILLS

Languages: Python, SQL, C++, R

Machine Learning: Scikit-Learn, Classification, Regression, Clustering, Ensemble Learning, Feature Engineering, Model Evaluation, Hyperparameter Tuning

Deep Learning & NLP: PyTorch, Hugging Face Transformers, CNNs, Transfer Learning, Fine-Tuning, Transformer Architectures, TF-IDF, Cosine Similarity

Generative AI & RAG: RAG, ChromaDB, Vector Databases, Embeddings, Semantic Search, Context Retrieval, Prompt Engineering, LLM Application Development, OpenRouter, Groq

Deployment & Tools: FastAPI, Docker, Git, GitHub, CI/CD, Model Deployment, REST APIs, Playwright, AWS, GCP, Jupyter Notebook, MLOps, Kubernetes, Data Pipeline, Experiment Tracking, Version Control

EXPERIENCE

Machine Learning Intern | Future Interns

Jan 2026 – Feb 2026 | [Certificate](#)

- Developed and evaluated machine learning pipelines for ML-based candidate screening across 1,000+ resumes.
- Performed exploratory data analysis, data preprocessing, and feature engineering, improving model performance by 10%.
- Evaluated classification models using Accuracy, Precision, Recall, and F1-score
- Designed and implemented an automated candidate ranking pipeline for processing and ranking 1,000+ resumes.

PROJECTS

[MyContextAI — Personal RAG Assistant](#) Jan 2026 – Mar 2026 | • Python • FastAPI • ChromaDB • Docker • REST APIs

- Developed a production-grade RAG platform for building AI assistants from public profiles.
- Enforced a multi-source ingestion pipeline that indexed 500+ documents using semantic retrieval with ChromaDB.
- Built a context-aware Q&A system with persistent vector storage and automated indexing workflows.

[CodeShield AI — AI-Powered Code Security Platform Python](#) Jan 2026 – Mar 2026 | • Groq • Docker • GitHub Actions

- Engineered a repository security platform to identify vulnerabilities, exposed secrets, insecure configurations, and dependency risks.
- Designed an analysis pipeline for vulnerability detection using static scanning and LLM-based code review.
- Delivered responsive dashboards, downloadable security reports, Docker deployment, and integrated CI/CD workflows.

[VectorForgeML — ML Framework \(R & C++\)](#) | Dec 2025 – May 2026 | [CRAN Published](#)

- Engineered a high-performance ML framework integrating R with a C++ backend for scalable model training
- Implemented machine learning algorithms including Linear Regression, Logistic Regression, Decision Trees, Random Forest, KNN, PCA, and K-Means from scratch.
- Improved computation speed using OpenMP parallelization and BLAS/LAPACK optimizations.
