

MOHD. MUSHEER

Software Engineer | ASP.NET Core | C# | Backend Development | AI

+91 9370086707 | musheerayan@gmail.com | musheer.me | [LinkedIn](#) | [GitHub](#) | Pune, Maharashtra

PROFESSIONAL SUMMARY

Software Engineer with experience building enterprise backend applications using **ASP.NET Core, C#, SQL Server, Entity Framework Core, and React.js**, along with practical experience integrating **Generative AI and Large Language Models** into production systems. Developed scalable REST APIs, authentication systems, real-time applications using SignalR, AI-powered security analysis platforms, and machine learning solutions. Strong understanding of **Object-Oriented Programming, Data Structures & Algorithms, SOLID principles, RESTful API design, and software architecture**. Interested in Backend Development, Cloud Technologies, AI-powered Software Engineering, and Enterprise Application Development.

EDUCATION

Bachelor of Computer Applications (BCA)

Takshashila Mahavidyalaya, Amravati

2023 – 2026 | CGPA: 8.09

TECHNICAL SKILLS

Languages: C#, Python, SQL, C++, JavaScript, TypeScript

Backend: ASP.NET Core, ASP.NET Web API, Entity Framework Core, LINQ, SignalR, REST APIs, JWT Authentication

Frontend: React.js, HTML5, CSS3, Bootstrap

Databases: SQL Server, PostgreSQL, SQLite, ChromaDB

Software Engineering: OOP, Data Structures & Algorithms, Design Patterns, Asynchronous Programming, **Agile, Unit Testing**

AI & Generative AI: PyTorch, Scikit-Learn, Hugging Face, LLMs, RAG, Prompt Engineering, Semantic Search, Embeddings, Groq API

DevOps & Tools: AWS, Azure, Docker, Git, GitHub, GitHub Actions, CI/CD, Visual Studio, VS Code, Postman, Unity, Kubernetes, Scrum

EXPERIENCE

Machine Learning Intern | Future Interns

Jan 2026 – Feb 2026 | [Certificate](#)

- Developed and evaluated machine learning pipelines for ML-based candidate screening across 1,000+ resumes.
- Performed exploratory data analysis, data preprocessing, and feature engineering, improving model performance by 10%.
- Evaluated classification models using Accuracy, Precision, Recall, and F1-score
- Designed and implemented an automated candidate ranking pipeline for processing and ranking 1,000+ resumes.

PROJECTS

[CodeShield AI](#) – AI-Powered Repository Security Analyzer | ASP.NET Core, C#, React, SignalR, Docker

- Built an AI-powered repository security scanner using ASP.NET Core, Entity Framework Core, and React.js.
- Applied real-time scanning with SignalR, queue processing, AI analysis, and static security scanning.
- Integrated JWT authentication, SQL Server, Docker, GitHub Actions, and multi-format report exports.

[AI NPC – Intelligent Voice Assistant](#) | Unity, C#, AI

- Developed an AI-powered Unity NPC capable of understanding voice commands and responding with animations and speech.
- Integrated natural language interaction to answer programming questions and execute in-game actions like run, stop, and wave.
- Built using Unity, C#, speech recognition, and AI APIs for real-time interactive gameplay.

[VectorForgeML](#) – ML Framework | C++, R | [CRAN Published](#)

- Built a high-performance machine learning framework from scratch with an optimized C++ backend and R package integration.
- Implemented supervised and unsupervised algorithms including Linear Regression, Logistic Regression, Random Forest, KNN, PCA, and K-Means.
- Accelerated computation using OpenMP parallelization and BLAS/LAPACK numerical libraries for scalable model training.
